

Starting from here

Path: /testStudent/add
Class: TestStudent
Method: add
Parameters: 2 Parameters
1.com.thinking.machines.webRock.pojo.RequestScope
2.bobby.test.Item
Return Type: java.lang.String
Other Annotations:
@com.thinking.machines.webRock.annotations.Path(value="/testStudent")

Path: /testStudent/getAllStudents
Class: TestStudent
Method: getAllStudents
Parameters: 1 Parameters
1.com.thinking.machines.webRock.pojo.ApplicationScope
Return Type: java.lang.String
Other Annotations:
@com.thinking.machines.webRock.annotations.Path(value="/testStudent")

Path: /student/update
Class: StudentService
Method: update
Parameters: 1 Parameters
1.bobby.test.Student
Return Type: void
Other Annotations:
@com.thinking.machines.webRock.annotations.Path(value="/student")
@com.thinking.machines.webRock.annotations.POST()

Path: /employee/add
Class: Employee
Method: add
Parameters: 1 Parameters
1.com.thinking.machines.webRock.pojo.RequestScope
Return Type: java.lang.String
Other Annotations:
@com.thinking.machines.webRock.annotations.Path(value="/employee")

Path: /employee/method6
Class: Employee
Method: method6
Parameters: 0 Parameters
Return Type: void
Other Annotations:
@com.thinking.machines.webRock.annotations.Path(value="/employee")

Path: /student/getAll
Class: StudentService
Method: getAll
Parameters: 0 Parameters

Return Type: java.util.List

Other Annotations:

@com.thinking.machines.webRock.annotations.Path(value="/student")

@com.thinking.machines.webRock.annotations.GET()

Path: /student/delete

Class: StudentService

Method: delete

Parameters: 1 Parameters

1.int

Return Type: void

Other Annotations:

@com.thinking.machines.webRock.annotations.Path(value="/student")

@com.thinking.machines.webRock.annotations.POST()

Path: /student/getByRollNumber

Class: StudentService

Method: getByRollNumber

Parameters: 1 Parameters

1.int

Return Type: bobby.test.Student

Other Annotations:

@com.thinking.machines.webRock.annotations.Path(value="/student")

@com.thinking.machines.webRock.annotations.GET()

Path: /employee/getAllEmployees

Class: Employee

Method: getAllEmployees

Parameters: 0 Parameters

Return Type: java.lang.String

Other Annotations:

@com.thinking.machines.webRock.annotations.Path(value="/employee")

@com.thinking.machines.webRock.annotations.Forward(value="/student/add")

Path: /student/add

Class: StudentService

Method: add

Parameters: 1 Parameters

1.bobby.test.Student

Return Type: void

Other Annotations:

@com.thinking.machines.webRock.annotations.Path(value="/student")

@com.thinking.machines.webRock.annotations.POST()
